

BRUNDTLAND

COMPANY PROFILE

CLIMATE CHANGE

RENEWABLE ENERGY

GREEN ECONOMY

A LEADING SOUTH AFRICAN CONSULTING FIRM

At Brundtland we strongly believe in shifting the local economy towards sustainable development through smart sustainability solutions that are financially feasible and allow growth while at the same time taking care of our planet and our people.

Our company aligns itself with the modern concept of 'sustainable development' as put forward in the 1987 report "Our Common Future" published by the Brundtland Commission.

"Sustainable Development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs"

The Brundtland team originally started out at EcoSecurities, a world leading company in originating, implementing and commercialising carbon credits. EcoSecurities was acquired by JP Morgan in 2009, and in 2010 the South

African operations spun-off as EcoMetrix Africa, maintaining its leading position in carbon project development and finance management.

In 2022, EcoMetrix Africa was rebranded as Brundtland, a sustainability consultancy company, to reflect the company's growth over the last two decades and to reaffirm our continued commitment and dedication to providing clients with the broader, holistic sustainability services we now offer. Working from its base in Johannesburg, South

Africa, our team has gained multiple years of experience in assisting business and government. As such, an in-depth understanding of the global and regional energy markets and climate change policies has been acquired. Our team consists of climate change, energy and sustainability experts with academic backgrounds in engineering, finance, economics and policy.

TAILORED SERVICES ALONG THREE DISTINCT SERVICE LINES

Brundtland leverages its global and domestic experience providing climate change, energy and sustainability related services along three distinct service lines.

CLIMATE STRATEGY

Respond to the physical, market and regulatory impacts of climate change

CARBON FINANCE

Southern Africa's most successful carbon revenue generation partner

ESG DISCLOSURE

Empowering organisations to disclose climate performance and ambition

Climate Strategy Our team at Brundtland combines climate change, financial and technical expertise to assess different corporate strategic and project-related sustainability options and provide independent advice regarding the best choice in terms of financial return, operational risks and sustainability impact. In the process, we use the latest cutting-edge research and insights to provide tailor-made solutions across a variety of economic sectors and activities.

In the public sector, we leverage our wide-ranging international and national experience when it comes to climate change policy development. Our advisory division assists government policy makers in setting clear goals and direction as well as providing meaningful pathways toward implementation. The company has experience working with all the key international and local stakeholders, such as the main international development agencies as well as all relevant South African national government

departments and large municipalities.

Carbon Finance At Brundtland we have in-depth experience to get your carbon projects registered, but even more importantly, in such a way that indeed your project will generate carbon credits. Having successfully issued and/or commercialised over 7.5 million carbon credits across a range of sectors and technologies, Brundtland is the most successful carbon revenue generation partner in Southern Africa.

ESG Disclosure Brundtland has all-round expertise when it comes to both the regulatory compliance reporting and voluntary disclosure landscapes. Our experts have multiple years of experience with the relevant regulations and standards, across sectors in the economy, and are fully abreast of the latest developments. We investigate what standards and protocols are worthwhile to implement voluntarily and provide implementation support through appropriate systems, processes and procedures.

SERVICE OFFERINGS

Our team of experts offer a range of services targeted at making our economy and society more sustainable in terms of energy use, greenhouse gas emissions and climate resilience.

- ISO 14064
- Carbon Disclosure Project (CDP)
- Science Based Targets initiative (SBTi)
- Taskforce on Climate-related Financial Disclosures (TCFD)
- Environmental, Social and Corporate Governance (ESG)
- Product footprints and LCAs

YOUR PARTNER IN CLIMATE CHANGE, GREEN ECONOMY AND RENEWABLE ENERGY

Whether in business or government, we invite you to discuss with us the challenges and opportunities that come with a transition to a low-carbon economy and society. Our team acknowledges that this transition requires a balancing act between environmental

and socio-economic needs. While we value to environmental benefits of climate change mitigation, we understand that low-carbon investments need to make economic sense as well to provide financially sustainable solutions.

Brundtland has successfully serviced and engaged with a wide range of South African and international organizations, including the following:
